## Client Feeding

Kerwee offers producers and investors a unique system of feeding cattle for specifically targeted consumers. Out diets and feeding regimes are tailored for desired outcomes, manufactured and distributed to the feed bunk with high integrity.

Producers may also retain ownership of their livestock and share the feeding cost with Kerwee in an alternative strategy that allows less direct investment in producing grain fed beef.

Kerwee maintains several industry accreditations which enables producers and investors to target alternative beef outcomes.

Kerwee uses the latest technology in ration mixing and feed distribution, ensuing accurate accountability and invoicing against cattle on feed.

## **LOT FEEDERS PTY LTD**

Kerwee has a high caliber of experienced people handling client cattle, drafting to specification, maintaining animal health, milling, feeding and administering client accounts.
